Bamboo flooring in elegant styles

Inovar Floors caters to flooring, ceiling and cladding solutions exclusively tailored to suit your needs for different spaces: outdoors, indoors, moderate to high traffic and residential to commercial areas. Our decors come with contemporary looks, exceptional durability, eco credentials and hassle-free maintenance, bringing you a remarkable assortment of decors to transform any space.

Need more contemporary yet green flooring choices for your interiors? Inovar's Bamboo Flooring is an environmentally friendly and smart choice to enhance your interiors with its naturally suave looks. Our stylish floors are created only from selected Moso species so as to bring you unsurpassed quality.

The Janka hardness test is used to measure the resistance of a sample of wood to denting and wear. A common use of Janka hardness ratings is to determine whether a species is suitable for use as flooring, and strand woven bamboo scores the highest for its strength.

We use the innovative strand woven technology to produce a high density bamboo composite which is remarkably durable. Our bamboo floors are created with sophisticated features utilizing its naturally high tensile strength. Also, the anti-scratch overlay makes it wear resistant while the patented glueless interlocking system ensures you of easy installation and worry-free maintenance. Sourced from sustainable bamboo plantations, these floors are extremely eco-friendly and can set the perfect backdrop for innovative interior concepts and ideas.

Stain
Resistant

Hygienic &
Easy to Clean

Resistant to
Cigarette Burn

Stands Up To
Wear and Tear

Does not breed
Dust-Mites

Strand woven bamboo is harder than Solid wood, giving you long lasting floors.

Recommended for homes, showrooms, hotel rooms and other interior spaces excluding wet areas.
