Durable decking for your outdoors

Inovar Floors caters to flooring, ceiling and cladding solutions exclusively tailored to suit your needs for different spaces: outdoors, indoors, moderate to high traffic and residential to commercial areas. Our decors come with contemporary looks, exceptional durability, eco credentials and hassle-free maintenance, bringing you a remarkable assortment of decors to transform any space.

Let our durable decking floors set the perfect backdrop for you to enjoy the outdoors! From classic to modern designs, our WPC and timber decking provide a non-slip surface with no visible screw heads and require no special treatment for maintenance.

We now bring you revolutionary decking engineered for high traffic and outdoor exposure with the Exclusive Invisible Fastening System. The floor surface has gaps small enough to block rings, coins, leaf-litter, food and other small objects from falling through, yet optimal for water drainage. Also, these floors use protective treatments for burrowing insects, fungi and contact with ground and fresh water while the brushed surface and rounded-off lateral edges facilitate underfoot comfort.

These exciting features offer advantages in its safety and maintenance, and the wear resistant surface withstands outdoor conditions with great ease. So you can now explore the stunning range of decking in a choice of designs to enhance your outdoor space.

Recommended for verandas, porticos, pool sides and other outdoor spaces.

*Dimension: 2900 mm (L) x 150 mm (W) x 25 mm (T)
More options in length/width/thickness available for projects.*

Ceilings and claddings in contemporary styles

Enhance your interiors with ease with our WPC and PVC ceiling and cladding solutions! Created with materials of high durability for indoors and outdoors, these panels use the clip system for easy installation and maintenance.

Further, the overlay makes it resistant to household chemicals ensuring easy maintenance. The core is a light-weight composite made from recycled plastics and wood from the construction industry and is resistant to moisture and insects.

Available in a vibrant choice of colours and finishes, we bring you the flexibility of customizing WPC and PVC ceiling and cladding solutions exclusively to beautify your space.

Recommended for interior ceilings and wall ceilings of villas, homes and balconies.
